## Part I Basic principles

<b>1 Introduction to polymeric nanomaterials</b>	<b>3</b>
<i>Kuruvalli Gouthami, Lavanya Lakshminarayana, Basheerabegum Faniband, V. Veeraraghavan, Muhammad Bilal, Ram Naresh Bhargava, Luiz Fernando Romanholo Ferreira, Abbas Rahdar, Siddappa Kakkameli and Sikandar I. Mulla</i>	
1.1 Introduction	3
1.2 Types of polymeric nanomaterials	5
1.2.1 Natural polymer-based nanomaterials	5
1.2.2 Chemically synthesized polymer materials	7
1.3 Methods for production of polymeric nanoparticles	8
1.3.1 Solvent evaporation	8
1.3.2 Emulsification/solvent diffusion	9
1.3.3 Emulsification/reverse salting-out	9
1.4 Applications of polymeric nanomaterials	10
1.4.1 In agriculture sector	11
1.4.2 In medical field	14
1.5 Current and future perspective	18
References	18
<b>2 Polymer-based nanomaterials: an introduction</b>	<b>27</b>
<i>Gautam M. Patel, Vraj Shah, Jaydip Bhaliya, Pinaz Pathan and K.M. Nikita</i>	
2.1 Nanomaterial introduction	27
2.1.1 Inorganic nanomaterials	27
2.1.2 Organic nanomaterials	28
2.1.3 Carbon-based nanomaterials	29
2.1.4 Composite-based nanomaterials	30
2.2 Introduction of polymeric nanomaterials: polymers, types of polymers, and polymeric nanomaterials	32
2.3 Various synthesis techniques for polymeric nanomaterials and its characterization	36

2.3.1	Solution casting-ultra sonication	36
2.3.2	Melt blending	41
2.3.3	In-situ polymerization	41
2.3.4	Electrospinning	42
2.3.5	Electrodeposition	42
2.4	Applications of polymeric nanomaterial in different fields	42
2.4.1	Coatings and paints	43
2.4.2	Biomedical	45
2.4.3	Sensors	47
2.4.4	Supercapacitors	48
2.4.5	Shape memory polymer composites	48
2.4.6	Packaging	48
2.5	Properties of polymeric nanomaterials	49
2.6	Conclusion and future perspectives	50
	References	51
<b>3</b>	<b>Smart polymeric nanocomposites: synthesis and applications</b>	<b>61</b>
	<i>Bilal Akram, Rana Farhat, Ahmed Shjua and Javeed Akhtar</i>	
3.1	Introduction	61
3.2	Some novel polymeric nanocomposites	62
3.2.1	Nanocomposite materials containing petroleum-based polymers	62
3.2.2	Biopolymer based nanocomposites	62
3.2.3	Sol-gel ceramics	65
3.2.4	Fillers in elastomers	65
3.2.5	Polymer-modified ceramics	66
3.2.6	Polymer/silica nanocomposites	67
3.2.7	Plasmonic polymeric nanocomposites	71
3.2.8	Ferroelectric polymer-based nanocomposites	75
3.3	Applications of polymeric nanocomposites	78
3.3.1	Drug delivery applications	78
3.3.2	Tissue engineering applications	79
3.3.3	Photothermal applications	81
3.3.4	Water purification applications	83
3.3.5	Sensor applications	84
3.3.6	Energy storage applications	85
3.3.7	Optical applications	86
3.4	Conclusions	87
	References	87
<b>4</b>	<b>Organic and inorganic nanoparticles</b>	<b>93</b>
	<i>Ehsan Ullah Rashid, Shahid Nawaz, Junaaid Munawar, Aniruddha Sarker, Shahid Hussain, Hafiz M.N. Iqbal and Muhammad Bilal</i>	
4.1	Introduction	93
4.2	Organic nanoparticles	94

---

4.3	Generally recognized as safe nanoparticles	94
4.4	Polysaccharides-based nanoparticles	94
4.5	Protein-based nanoparticles	95
4.6	Lipids-based nanoparticles	96
4.7	Micelle	96
4.8	Liposomes	97
4.9	Dendrimers	98
4.10	Synthesis approaches for organic nanoparticles	99
4.11	Self-assembly	99
4.12	Nanoprecipitation	100
4.13	Coordination dependent self-assembly	100
4.14	Thin-film hydration-based self-assembly	100
4.15	Emulsification	101
4.16	Precipitation induced by solvent removal	101
4.17	Solvent evaporation method	101
4.18	Salting out	102
4.19	Gelation of the emulsion droplets	102
4.20	Emulsion polymerization	102
4.21	Conventional emulsion polymerization	103
4.22	Surfactant-free emulsion polymerization	103
4.23	Interfacial polymerization	103
4.24	Controlled/living radical polymerization	103
4.25	Inorganic nanoparticles and their applications	103
4.26	General strategies for the synthesis of uniform inorganic nanoparticles	104
4.27	Synthesis of metallic nanoparticles by different methods	104
4.27.1	Synthesis of gold nanoparticles	104
4.28	Method for preparation of iron oxides nanoparticles	105
4.29	Synthesis of magnetic nanoparticles by decomposition in organic media	105
4.30	Synthesis of quantum dots	105
4.31	Synthesis of carbon nanotubes by electric arc discharge method	106
4.32	Magnetic nanoparticles	106
4.33	Metallic inorganic nanoparticles	107
4.34	Gold nanoparticles	108
4.35	Silver nanoparticles	108
4.36	Iron oxide nanoparticles	109
4.37	Quantum dots	109
4.38	Carbon-based nanomaterial like carbon nanotubes	111
4.39	Conclusion	112
	References	112
	Further reading	119

<b>5</b>	<b>Precipitation polymerization</b>	<b>121</b>
	<i>Sabir Khan, Jaime Vega-Chacón, Gerson A. Ruiz-Córdova, Charles Pizan-Aquino, Eduardo EJ Jara-Cornejo, Sergio Espinoza Torres, C. Jacinto-Hernández, Rosario López, Maria D.P.T. Sotomayor, Gino Picasso and Javier E.L. Villa</i>	
5.1	Precipitation polymerization	121
5.2	Synthesis (choice of precursor), controlled radical precipitation polymerization, photopolymerization	123
5.3	Self-stabilized precipitation polymerization	126
5.3.1	2SP Stability mechanism of polymerization	127
5.3.2	Nucleation and growth mechanism in 2SP polymerization	128
5.4	Application, merits, and demerits	128
5.5	Conclusions	132
	References	133
<b>6</b>	<b>Characterization of polymeric nanoparticles</b>	<b>141</b>
	<i>Sabir Khan, Ademar Wong, Shakeel Zeb, Bianca Mortari, Javier E.L. Villa and Maria D.P.T. Sotomayor</i>	
6.1	Introduction	141
6.2	Particle size, distribution, agglomeration, and shape: transmission electron microscopy, scanning electron microscopy, and atomic force microscopy	142
6.3	Composition and structure	145
6.4	Charge on the surface: zeta potential	149
6.5	Crystallographic structure	151
6.6	Discovery of nuclear magnetic resonance spectroscopy	151
6.7	Differential scanning calorimetry & thermal stability	154
6.8	Conclusion	155
